01 · THE PROBLEM

EVERY MISSED CALL IS A CUSTOMER WALKING AWAY.

THE 6 PM BLACK HOLE

Calls after hours hit voicemail. The customer doesn’t leave a message — they dial the next clinic on the list.

THE RECEPTION BOTTLENECK

One person, five channels: phone, walk-ins, email, WhatsApp, Telegram. Routine questions eat the whole day.

GENERIC BOTS, LOCKED DATA

Today’s voice-bot platforms are per-minute, one-size-fits-all, and trap call data with no dashboard to see what is happening.

★ STAFF CANNOT SCALE TO 24/7. SOFTWARE CAN.

02 · THE SOLUTION

ONE AI EMPLOYEE. EVERY CHANNEL. YOUR RULES.

A configurable platform that deploys a voice + chat agent per business — built on open source, hosted for you, visible in one dashboard.

TALKS & LISTENS

Natural voice calls on phone and web, responding in under 800 ms so it feels human.

ACTS, NOT JUST ANSWERS

Checks availability, books calendar events with invites, sends emails, updates Google Sheets.

EVERYWHERE CUSTOMERS ARE

Phone, web voice, WhatsApp, Telegram and social inboxes — one brain across all of them.

YOUR DATA, YOUR DASHBOARD

Calls, transcripts, bookings, outcomes and costs in one live view.

ONE CORE CODEBASE | PER-CLIENT PROMPT | PER-CLIENT VOICE | PER-CLIENT TOOLS

03 · ONE AGENT, MANY HATS (CLICK A CARD)

HIRE IT FOR ANY FRONT-DESK JOB.

RECEPTIONIST
Answers every call on ring 1, greets by name, never puts anyone on hold.

EVERY TURN OF EVERY CALL — THE VOICE LOOP

SELF-HOSTED STT / TTS · SWAPPABLE

CALLER SPEAKS → STT · FASTER-WHISPER → LLM BRAIN + TOOLS → TTS · COSYVOICE → CALLER HEARS

05 · BUILT FROM OPEN SOURCE — 5 LAYERS, ALL SWAPPABLE

EVERY LAYER IS FREE TO RUN. WE SELL THE GLUE.

VOICE RUNTIME	**LiveKit Agents · Pipecat**	WebRTC + SIP calls, interruptions, turn detection	Apache 2.0 / BSD
EARS & MOUTH	**faster-whisper · CosyVoice · Fish · KittenTTS**	self-hosted STT/TTS, swappable behind one interface	MIT / Apache
BRAIN	**Any LLM via SDK tool calling**	OpenAI, Anthropic, Gemini — no lock-in	API
TOOLS & GLUE	**n8n · Activepieces · Composio**	Calendar, Gmail, Sheets with OAuth handled	MIT / fair-code
OMNICHANNEL INBOX	**Chatwoot (+ official WhatsApp API)**	no unofficial gateways — bans are real	MIT
DATA & DASHBOARD	**Postgres + Metabase / Grafana**	calls, transcripts, outcomes, costs	MIT / AGPL

06 · BUILD PLAN & TIMELINE

THE BUILD ORDER

1. DEFINE TOOLS AS FUNCTIONS
2. PROVE ON TELEGRAM (TEXT)
3. ADD VOICE, SAME BRAIN
4. WHATSAPP AS THIN ADAPTER
5. POSTGRES + DASHBOARD
6. PILOT WITH 1–2 BUSINESSES

GUARDRAILS: <800 MS LATENCY BUDGET · CONFIRM-BEFORE-WRITE · PER-CLIENT OAUTH · RECORDING CONSENT

07 · WHY THIS IS A BUSINESS

CUSTOM-SOFTWARE PRICING. OPEN-SOURCE COSTS.

HOW WE MAKE MONEY

- Build fee per client + monthly hosting & maintenance (recurring)
- Self-hosted voice → per-minute cost collapses vs hosted platforms
- One codebase → every new client is cheaper to onboard than the last

WHAT CLIENTS GET

- Fewer missed calls — every call answered 24/7
- Faster responses and automated booking + follow-up
- Lower staffing cost for routine inquiries

WHAT WE MEASURE & REPORT

ANSWER RATE
BOOKING CONVERSION
AVG RESPONSE TIME
COST PER CALL
STAFF HOURS SAVED

Every client sees the numbers — that's the retention engine.

NEVER MISS ANOTHER CALL.

- Works 24/7
- Books while you sleep
- Your data, your dashboard
- Open-source core

★ LET'S PILOT IT WITH ONE BUSINESS THIS MONTH.
